“ Very high dynamic performances and panel curvature, offering the best viewing conditions and an extraordinary immersive experience, designed to best reproduce games moving images and Videos. ”

VANTAGGI

**CURVED
SLIM DESIGN**

The Curved Ultra-slim panel offers an enveloping and immersive viewing experience with a high degree of realism.

The Low Blue Light function reduces blue and violet frequencies emission. An important protection for our eyesight.

**1ms
Response**

1ms response time with Overdrive technology ensures smooth images and video.

The technology developed by AMD that dynamically synchronizes graphic card and display, eliminating annoying effects such as stuttering, screen tearing, input lag.

**144Hz
FREQUENCY**

The 144Hz refresh rate guarantees video and games without dragging effects, even in the most dynamic scenes.
