YASHI

LEGGIO

DY 32202

Yashi Digital Leggio is the Totem for high-interactivity Digital Signage to realize projects as Infopoint in internal environments. YASHI Leggio is designed to stand out in any type of environment, to attract the interest of the users and invite them to come closer to discover its contents.

These benefit from the Pivot function versatility to offer the desired interaction with the end users and get the most attention.

FEATURES

PIVOT ROTATION

The screen rotates 90° to adapt to your professional needs.

The capacitive touch display allows simultaneous use up to 10 touches. Display is adaptable, precise, solid and scratch resistant.

Italian style and design with a minimalism and simple shape that suits every furniture's context.

IPS technology guarantees a wide view angle, deepness of color and an ideal contrast for every condition of environmental light.

Low energy consumption guarantees a low cost of ownership over a long period of time
