

YASHI

20 years of experience and know how

Yashi: "The Hi-Tech Digital Factory" is famous for the Pioneer monitor and All in One series, totem, multimedia table and interactive display. Yashi's unique style and technological contents are always a step ahead.

The constructive philosophy begins always with the human being and the company at the center, thinking about the smart use of each product with a strong design that represents them.

Yashi is also the manufacturer of many worldwide brands.

Yashi top quality Research and Development department produces always new prototypes / models every year, thanks to requests coming from all over the world.

Design and style are made in Italy.

Yashi is technical partner and sponsor of several sport events: Serie A football, motoGP, Serie A volley, rally and talent shows.

PIONEER MONITOR SERIES

Yashi Pioneer is the most fashion and slimmest monitor series in the market with IPS frameless display and speakers included.

Aluminum alloy stand and silver alloy stripes embellish this minimal and elegant monitor.

Yashi Pioneer Series includes special models for gamers and graphic users up to 49".

MONITOR

YASHI

OUR PRODUCTS

MATRIX MONITOR SERIES

Matrix Series is Yashi's modern and classic interpretation of metropolitan and underground style.

Yashi Matrix Series has a wide range of monitor from 15.6" up to 40" with high performance features such as IPS frameless display with high brightness, pivot stand and touch display.

AIO SERIES PIONEER S

AIO Yashi Pioneer S is the perfect and compact match between high quality monitor and integrated mini pc.

Thanks to the privacy webcam and integrated speakers, AIO Pioneer S is the best solution for smartworking and education.

24" and 27" frameless IPS display and the latest generation desktop CPU are the main features to reach top performances.

AIO SERIES QUANTUM S

Yashi Quantum S, the new "state-of-the-art" product for ergonomics and versatility.

It's designed to be unique thanks to: lateral rotation, height adjustment, pivot function and privacy camera.

Latest generation desktop CPU guarantee top performances.

FLORENCE

AIO
SERIES

Yashi Florence: the cutting-edge materials with which it's created make it elegant and minimal, suitable for any context.

The IPS Full HD display provides capacitive touch technology that allows precision, stability, scratch resistance and finger pressure.

It's the most elegant and best designed solution for Home use and also Retail business thanks to the COM port.

PRODUCTS

Yashi's philosophy

*Geometrical shapes melt with "Time and Space" dimension for communication at maximum power.
Yashi's goal is "communicating within communication", where the shape captures the attention to amplify the content.*

TOTEM
SERIES

LUXURY

Exceeds the totem's concept.

The unmistakable style enriches the space, enhancing the message.

Successfully communicates the idea of exclusive marketing thanks to the luxury interpretation of design.

Totem Luxury represents the best product to emphasize company / brand / product as well as being a collection point of users' data.

PYRAMID

TOTEM
SERIES

INTERACTIVE iDESK

Yashi Interactive I-Desk: when learning becomes fun and business look to the future. Young digital natives live with the idea that everything can be interactive and this awareness help them improve their thought process. Yashi engineered the Interactive Intelligent Desk, to help them gain even better results.

Yashi I-Desk is a learning tool, starting from childhood, and, thanks to the adjustable height, also a professional tool for adults.

Available with 43" to 65" display, with Android and Windows system.

The electronic adjustable height varies from 52 to 72.5 cm, making the desk suitable for both learning and business.

Complete gap absence between display panel and front glass grants better touch response, wider view angles and less light reflection.

Great for any environment. The 550 nit screen is capable of displaying clear, crisp images and videos with any light conditions.

Sturdiness and stability grant a weightload on the display panel up to 250 Kg. Rounded corners increase the overall safety of the machine.

Water-proof: spilling liquids won't compromise the desk functionality, allowing for uninterrupted digital and creative activities.

INTERACTIVE DISPLAY

OUR
PRODUCTS

FTSY804 devices with face recognition recording, can easily fulfill the simple access control demands, open doors or gates, as a perfect badge replacement. Stop badge losses or excuses.

ACCESS
CONTROL

BIOMETRIC FACE RECOGNITION

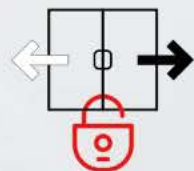

Access recording

Biometric face recognition allows you to verify every employee/visitor presence by a simple passage. Exportable statistics.

Monitoring areas

Maximum security and protection of company assets: every single employee entrance can be authorized or denied in specific areas and specific days/hours.

Doors/ticket gates opening

Thanks to the Wiegand connectors it can control also unattended entries (doors, ticket gates) and remote control in real time.

Integrating with managements

It is possible to interface the access database with most common company managements to transmit the collected clock-in.

Verifica C19 and Temperature control

Automatize the Green Pass, temperature and mask control. Rules, limits and permissions can also be managed by remote control software.

SUZUKA **ULTRABOOK**

YASHI designed the Suzuka ultrabook based on portability: the frameless IPS display maximizes the visual area and guarantees real colours, frontal cooling and the "reverse" opening make this elegant device an ultra compact "par excellence"!

The 2MP camera guarantees video calls with clear and fluid images. i3/i5/i7 CPU Intel and long-lasting battery make it perfect for the entire working day and/or study.
